

DecoPrint-P2000

HOT STAMPING PRESS FOR MODULAR BUILD-UP

Application possibilities

- Hot stamping for various articles among others for the cosmetic-, glass-, plastic-, food- and automotive-industry.

Main features

- Customer specific configuration due to modular build-up
- Modular foil feeding system allows a precise processing of all kind of stamping and heat transfer foils
- High availability and reliability
- Simple operation
- Rapid production changeover due to quick heating heat adjustment and die change system
- SPS electronic control with visual display and diagnosis

Technical data

- | | |
|--------------------------------|--------------------------------|
| • Stamping pressure | 2'000 dN at 6 bar |
| • Standard stamping surface | 140 x 230 mm / 135 x 330 mm |
| • Foil width | up to 140 mm (Option 200 mm) |
| • Foil diameter | ø 25.4 mm / ø 150 mm |
| • Loading depth | 285 mm |
| • Height (die plate and table) | up to 635 mm |
| • Stroke | 0 – 40 mm (Option up to 80 mm) |
