

DecoPrint-P350

HOT STAMPING UNIT FOR INDUSTRIAL USE

Application possibilities

- Designed for the use in automation or as a small stand alone stamping module.

Main features

- Control systems for independent application
- Interface for an integrated application
- High hot stamping accuracy
- Modular foil feeding system for integration in production lines.
- High availability and reliability
- Simple operation
- Adjustable foil tension
- Adjustable head for simple adjustments (Option)

Technical data

- | | |
|---------------------|---------------------------|
| • Stamping pressure | 350 dN at 6 bar |
| • Stamping surface | 80 x 80 mm |
| • Foil diameter | ø 25.4 mm / ø 120 mm |
| • El. connections | 230 V, 50/60 Hz |
| • Cycles | up to 100 cycles / minute |
| • Temperature | up to 300 C |
